PROFESSIONAL SUMMARY

Dynamic Cloud Professional with over 4 years of experience in container orchestration, cloud automation, and technical support. As a Technical Support Engineer at IBM India Software Labs in Kochi, I specialized in resolving customer issues related to Data Virtualization and BIGSQL. My role involved utilising container orchestration platform Redhat Openshift and DVaaS on IBM Cloud to provide efficient solutions for clients. I collaborated with cross-functional teams to ensure seamless integration and support, showcasing strong problem-solving skills and technical expertise. Proven track record in building scalable CI/CD pipelines, automating multi-cloud resource discovery, and managing high-availability openshift clusters

PROFESSIONAL EXPERIENCE

IBM, Kochi | *Technical Support Professional* | 11/2024 – Present

- Providing advanced technical support for Data Virtualization (DV) on CP4D on prem and Cloud, Db2 REST API, and BigSQL on Cloud Pak for Data.

Cloud That Technologies, Bangalore | *Research Associate* | 09/2022 – 05/2024

- Engineered automated CI/CD pipelines using AWS DevOps to streamline software delivery.
- Implemented automated monitoring, alarming, and dashboarding solutions to improve system visibility.
- Conducted research on multi-cloud integration and developed best practices for cloud resource management.

Cloud That Technologies, Bangalore | *Research Intern* | 03/2022 – 09/2022

PROJECTS

Multi-Cloud Resource Discovery Engine (Go & React)

- Developed a high-performance Go (Golang) backend to support parallel resource scanning across 21 AWS regions and 10 IBM Cloud regions.
- Implemented a goroutine-based concurrent processing model and a Background Resource Discovery Scheduler with a 15-minute cache TTL.
- Utilized AWS Resource Groups Tagging API and IBM Resource Controller to discover all tagged cloud services automatically.

Production-Grade AWS Infrastructure Automation

- Designed a high-availability 2-tier architecture featuring Multi-AZ RDS, VPC, and Load Balancers.
- Built a robust CI/CD pipeline with automated rollback capabilities triggered on application failure.
- Integrated MS Teams notifications for real-time CI/CD status updates and utilized S3 for versioned deployment rollbacks.

Amazon EKS Cluster Infrastructure Setup

- Provisioned a secure EKS cluster using Terraform and AWS CLI, configuring IAM roles and OIDC providers.
- Optimized networking by configuring Internet Gateways and specific Security Groups for worker node communication.

CERTIFICATIONS

- Microsoft Certified: Azure Data Fundamentals - Microsoft
- Microsoft Certified: Azure Fundamentals - Microsoft
- HashiCorp Certified: Terraform Associate (002) -HashiCorp
- AZ-400: Designing and Implementing Microsoft DevOps Solutions - Microsoft
- AWS Knowledge: Architecting - Amazon Web Services

EDUCATION

- Master of Computer Applications (MCA) | Kristu Jayanti College | 2022
- Bachelor of Computer Applications (BCA) | Kristu Jayanti College | 2019
